A Noble in the King's court, you try to gain his Royal favour, but he's constantly changing his mind about what he wants. Still, you try to gather as much of the items he desires (for the moment).

Collect gold and other valuable objects that the King asks for, but be ready, as he changes his mind at anytime.

When presenting gifts to His Highness, your point score is based on how much better you did in finding treasure, over the other Nobles and the timing of your offering.
