Short Synopsis

You've landed a spot on the line at one of the best ramen shops in the world — at least to the locals. But, there's a catch: you've agreed with your fellow line cooks that whoever serves the most (and the best) Bowls of ramen gets to walk away with all of the day's tips. So, fire up the noodle boilers and get to work on crafting the most delicious ramen possible — and engage in a bit of soup-subversion while you're at it!

On each turn, players add ingredients to the ramen bowls waiting to be served, trying to build the highest point count before serving, while trying to avoid giving their opponent an opportunity to steal the points!
