

# THESEUS:

## THE DARK ORBIT

**THESEUS: THE DARK ORBIT** puts players in the heart of a conflict between five factions trapped on the eponymous space station in deep space. Only one can survive...

During the game, players move their pawns around the space station and activate the abilities of different rooms. Every move you take changes the movement possibilities of your opponent. On your turn, you need to think about which room you want to reach and (in addition) how to mess your opponent's movement, which leads to great choices and meaningful decisions.

Rooms abilities change during the game as players install trait cards that give rooms new abilities and skills. Players create **THESEUS** during gameplay by placing traps, smart guns, secret passages and many other features. In every game **THESEUS** looks different; in every game it's deadly for you in a new way...
